Industries: **blockchain, cryptocurrency**

Use case: **customer onboarding/verification**

Solution: **Incode Omni**

* Capture and Identity Verification components

Problem:

- During the onboarding they want to set up a flow where the user receives a simple tutorial to take a picture of the ID, by the Front and back and then a selfie to validate the ID of the picture.

CHALLENGES

During this onboarding they want to set up a flow take a picture of the ID, the front and back will be captured and then a selfie will be taken to look for a match with the ID picture

Omni Crypto is that their new customers could do the onboarding in their website or/and in their android/iOS application.
